INTEGRITY
VIOLATION

[Surbatovich et al. 2017]

Moving from theory to practice

if SmartThings
sensor
is closed **then** post a
message
to Slack

Mailbox?
Main entrance?
Door to a safe?

To coworkers?
To my family?
Just to me?

- What fraction of users' IFTTT applets are violating, in practice?
- How much and what types of harm are IFTTT users actually exposed to?

We collected 743 rules from
28 IFTTT users

if SmartThings
sensor
is closed **then** post a
message
to Slack

Mailbox?
Main entrance?
Door to a safe?

To coworkers?
To my family?
Just to me?

*“If front Door
Sensor closed
then post a
message to a Slack
service” [P28]*

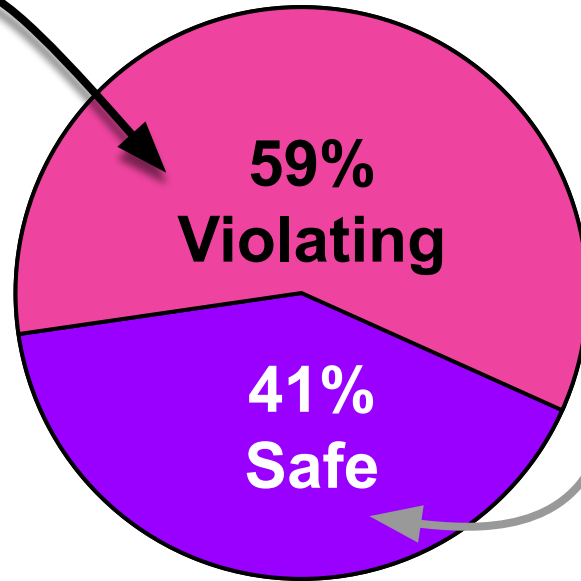

Evaluating participants' rules:
automated analysis
finds similar results

Evaluating participants' rules:
**considering context enables
more accurate analysis**

Are all of these
harmful?

No!

Are any of
these potentially
harmful?

20% surveillance
risks for *incidental*
users

Are any of
these potentially
harmful?

Yes!

How Risky Are Real Users' IFTTT Applets?

- Real user data → New insights about risks & harms
 - Many “violating” rules are not harmful
 - “Non-violating” rules could be harmful
 - More in the paper!
